Strongbridge Today

We deliver innovative IT modernization solutions that support the transformation of government.

Software. Security. Safety.

Strongbridge is modernizing old, outdated legacy systems to better accomplish our customers' mission:

- Achieving new levels of mission performance, preparedness, and efficiency through the application of emerging technologies
- Identifying and replacing underperforming software with modernized systems
- Leveraging domain expertise in transportation and labor laws to improve the safety and security of our nation's infrastructure

Across Government

We deliver innovative solutions for federal civilian and defense customers with mission-critical needs.

Supporting Mission Success

We play a critical role in ensuring mission readiness now and in the future.

DevSecOps
Systems Engineering
Big Data

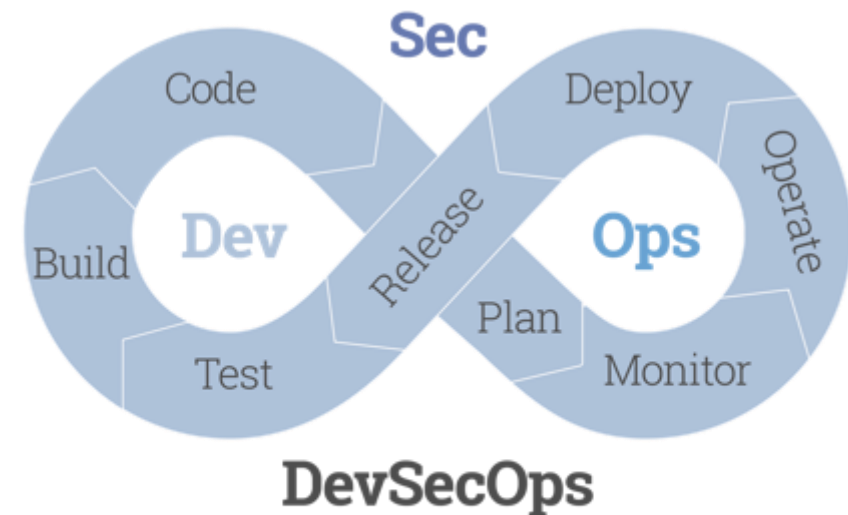

Cloud Migration
Cybersecurity
Emerging Technologies

DevSecOps

Our end-to-end solutions improve operational performance, increase mission efficiencies, and strengthen the security of government systems.

Our proven DevSecOps processes is based on these core foundations:

- Agile Development Thinking
- UI/UX Expertise
- Test Driven Development (TDD)
- Mobile App Development
- CMMI Level 3 Development Certification

Systems Engineering

Strong systems engineering (SE) practices are the foundation for contributing to the complex multi-system solutions found in our customer's IT portfolios.

System Interface Definition

Application Performance Monitoring (APM)

Control and Management of Multi-system Integration

Enterprise Service Design & Implementation

Application of Failover Architecture Patterns

Big Data

We are experts in customers' missions and understand the subtleties of collected data.

- The Entire Data Lifecycle
- Definition, Collection, Manipulation, Extraction, Transformation, Analysis
- CMMI Level 3 Processes
- SME's and Application Builders Store, Analyze, & Report
- Cloud Ecosystem Partnerships

Cloud Migration

Our full-spectrum, innovative solutions help you get to the cloud and keep your network efficient and secure.

- Cloud Native Development
- Cloud Migration
- Cloud-based DevSecOps
- Cloud Security
- Cloud Cost/Benefit Analysis

Cybersecurity

Cybersecurity is a primary focus area in all our work and is woven into the structure of our solutions.

Continuous Innovation of Security Practices

Enhanced Risk Management Framework (RMF)

Disciplined Development Process

Certified Information Systems Security Professional (CISSP) and CompTIA Security+

Increased Robustness of Applications, Architectures, and Components

Emerging Technologies

We utilize leading-edge technologies to transform our Federal customers' missions.

AI, ML, and RPA Solutions
End-to-end Delivery
Commercial Best Practices
Academic Innovation
AWS and Microsoft Partnership

Past Performance

Challenge: The National Highway Traffic Safety Administration (NHTSA) needed a standard service for the public to look up safety and related information on their vehicles based on each vehicle's identification number (VIN).

Unique Obstacle: Each manufacturer had made a unique series of VINs with their own layout and interpretation for items like model and production year.

Solution: Strongbridge worked across the commercial and government transportation communities to support the definition of VIN interchange, interpretation, and storage mechanisms and successfully migrated the NHTSA's VIN Lookup Service to the Microsoft Azure commercial secure cloud.

Past Performance

Challenge: The Department of Labor, Wage & Hour Division required modernization of their citizen-facing owed wages system in order to enhance CX as well as reduce manual processing.

Unique Obstacle: This system had three distinct end-users as it required a new customer facing interface, internal data management, and cross-agency collaboration with the Department of Treasury.

Solution: Strongbridge created a new custom platform that reduced the processing time for the customer from weeks to only a few days, increased efficiencies within the Wage & Hour division team, and aided in expedited payments to citizens owed wages from their past employers.

A Ready Workforce

We support our employee base with access to advanced training, knowledge repositories, and product certifications in all our customer relationships.

- Project Management Professional (PMP) certifications from the Project Management Institute (PMI)
- AWS and Microsoft certifications for skillsets in the application of cloud services and the development of software solutions

In the Community

Strongbridge focuses on “giving back” to communities and meaningful causes that have touched the lives and localities of our diverse workforce.
